Izzana Martins

Frontend Developer | React | Typescript | Javascript | Node
Feira de Santana, Bahia, Brazil

Summary

Hello! I'm Izzana, a Software Engineer specializing in frontend development and passionate about delivering impactful, user-centric solutions.

My Journey

Currently, I work at Zenvia as a Frontend Developer, where I focus on developing new features, bug resolution, API integration, testing, and code debugging. I use React + TypeScript and the MVVM pattern, following agile methodologies like Scrum and Kanban, to ensure continuous delivery of clean and maintainable code.

Previously, at Pix Force, I contributed as a Full Stack Developer, designing frontend interfaces with React + TypeScript and developing backend APIs using Python Flask and PostgreSQL. My focus was on creating seamless user experiences with modern, agile development practices.

Teaching and Mentorship

In addition to my software development experience, I've taught programming at BYJU'S Future School, where I guided young students in coding logic, web development, and even machine learning basics, fostering a love for technology and problem-solving among future programmers.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, Java

Frameworks: ReactJS, React Native, Flask, Bootstrap

Databases: PostgreSQL, Firebase

Tools: GitHub, VS Code, Docker

Others: Agile (Scrum), Kanban, MVVM

Goals

As a frontend developer, my goal is to continue advancing my expertise in crafting responsive and accessible user interfaces. I am

dedicated to refining my skills in FrontEnd, enhancing my knowledge of modern web technologies, and staying at the forefront of UI/UX design trends to deliver intuitive and engaging user experiences.

Projects and Collaborations

Check out my work on GitHub: <https://github.com/izzana>

Experience

ZENVIA

Frontend Developer | React | Typescript | JavaScript | Styled Components | MVVM | Design System

July 2023 - Present (2 years 4 months)

I work on developing new features, fixing bugs, consuming APIs, testing and debugging code, and versioning with continuous delivery, using React + TypeScript, MVVM, agile methodologies like Scrum and the Kanban board, ensuring clean, easily maintainable code delivery.

BYJU'S FutureSchool Brasil

Programming Teacher | React | React Native | Python | Git | Firebase

October 2021 - August 2023 (1 year 11 months)

Feira de Santana, Bahia, Brazil

- Instructing programming classes to around 50 children and teenagers, with a custom approach based on each student needs, including autism, ADHD and hyperactivity cases;
- Teaching programming logic and machine learning with JavaScript and ECMAScript to my multiple classes, analysing and debugging codes and teaching how to read erros and exceptions;
- Tutoring my classes on how to create responsive sites with HTML, CSS, JavaScript and Bootstrap, hosting their code on GitHub and deploy to GitHub Pages;
- Coaching students in the creation of Web and Android games and applications using tools such as p5.js, Code.org and MIT App Inventor;
- Assinting the application of tools like VS Code, Dialogflow and Firebase in multiple projects.

Pix Force

Full Stack Developer | React | Typescript | Javascript | Python | PostgreSQL | Flask

November 2022 - July 2023 (9 months)

- In the FrontEnd, I work on creating screens for various projects using ReactJS, with continuous delivery of features using modern technologies and agile methodologies such as Scrum and the Kanban board.
- In the BackEnd, I use Python Flask, along with SQLAlchemy as an ORM, for creating APIs, and PostgreSQL as the database management system.

Autonomous Professional

Private Teacher

February 2017 - October 2021 (4 years 9 months)

Brazil

- During 4 years I taught children and teenagers from Middle and High School, on multiple subjects, such as English, Mathematics, Chemistry and Portuguese;
- Tutored both in-person and online (with digital board) classes focused in preparation for trimonthly, finals and retake exams, resolution of lists of exercises and reinforcement classes;
- Adapted classes according to each student's characteristics and goals, some of them with bigger challenges, like ADHD and Autism.

Education

UNIFAN - Centro Universitário Nobre

Curso Superior de Tecnologia (CST), Análise e Desenvolvimento de Sistemas · (February 2022 - December 2024)
