[www.linkedin.com/in/sheory-martins](https://www.linkedin.com/in/sheory-martins) (LinkedIn)

## Principais competências

Computer Science

Enterprise Solution Design

Critical Thinking

## Certifications

Introduction to AI

Kafka: produtores, consumidores e streams

Clean Code - Python

LangChain e Python: criando ferramentas com a LLM OpenAI

Data Visualization: criando gráficos com bibliotecas Python

# Sheory Martins

Software Engineer | Python | PostgreSQL | MongoDB | AWS | Azure  
Irecê, Bahia, Brasil

## Resumo

Hello! I'm Sheory, a Software Engineer with solid experience in backend development, specializing in creating technological solutions that enhance the efficiency and performance of complex systems.

### My Journey

Currently, I work at Zenvia, where I lead refactoring projects and develop new features using Python, Flask, and FastAPI, along with databases such as PostgreSQL and MongoDB. My mission is to optimize the scalability, reusability, and performance of applications, ensuring the delivery of robust and efficient solutions.

Previously, at Serasa Experian, I contributed to the optimization of critical financial systems, focusing on improvements in credit and loan processes. I developed new microservices, led deployments, and implemented data caching with Redis, ensuring optimal performance.

### # Technical Skills

Languages: Python, JavaScript (ECMAScript), SQL

Frameworks: Flask, FastAPI, Django, React.js, jQuery

Databases: PostgreSQL, MongoDB, Redis

Tools: Git, Jenkins, AWS, Rancher, Docker, Splunk

Others: Agile (Scrum), Jira, Microservices Architecture, Code Optimization

### Goals

My focus is to keep evolving as a software engineer, solving complex problems, and creating solutions that have a significant impact in the market.

### Project and Collaborations

Check out my work at GitHub: <https://github.com/sheory>

## Experiência

### VONBZ

Back End Developer III & Tech Lead | Python | AWS | Redis | MongoDB | MySQL

novembro de 2024 - Present (1 ano)

- Led backend development for various client projects, overseeing the full project lifecycle from refining stories to developing, deploying, and ensuring the scalability of backend services using AWS Lambda, CloudWatch, SQS, and RDS.
- Responsible for the end-to-end backend architecture, utilizing MySQL, DocumentDB, and Python to design and implement robust solutions, ensuring high availability, and managing system performance.
- Own all aspects of backend engineering, including requirements analysis, technical decision-making, and deployment, ensuring seamless integration of systems while maintaining strong focus on efficiency and reliability.

### ZENVIA

Back End Developer II | Python | FastAPI | Flask | PostgreSQL | MongoDB | Kafka

abril de 2023 - novembro de 2024 (1 ano 8 meses)

- Develop and maintain features for both a customer success monolith and new microservices, with a primary focus on backend development using Python, Flask, and FastAPI. Ensured high code quality by maintaining at least 90% unit test coverage.
- Implemented optimized queries and database solutions using MongoDB and PostgreSQL to address performance issues, resulting in an average 70% improvement in response times and a significant reduction in system bottlenecks.
- Lead a refactoring initiative to improve the monolith's performance, reusability, and scalability, achieving more than 20% gains in efficiency per feature.

### Serasa Experian

Back-end Developer I | Python | FastAPI | AWS | Rancher | Jenkins | Redis

julho de 2022 - abril de 2023 (10 meses)

- Managed and improved existing microservices while developing new ones using Python and FastAPI for a team specializing in credit card and loan solutions, contributing to systems processing over 1 million requests daily.

- Led end-to-end development of 3 big features, from initial scoping and refinement via Jira to deployment using Jenkins, AWS, and Rancher, ensuring seamless integration and performance.
- Utilized Splunk and Datadog for monitoring 100% of existent routes and implemented Redis for efficient data caching, optimizing system performance and reducing latency.

## SenseData

11 meses

Back End Developer I | Python | FastAPI | Flask | PostgreSQL | MongoDB | ReactJs

maio de 2022 - julho de 2022 (3 meses)

- Prioritized and executed timely hotfixes to address critical production bugs, ensuring system stability and high performance, with a commitment to resolving issues within 24 hours of discovery.
- Optimized backend workflows within an all-encompassing customer success monolith through Python and Flask solutions; enhanced system reliability and reduced downtime by 50%, ensuring uninterrupted service delivery for end-users
- Contributed to a project that standardized backend development by establishing consistent practices for coding, testing, and documentation. Improving over 20 existent features.

Python Developer Intern | Python | Flask | PostgreSQL | MongoDB | ReactJs | JQuery

setembro de 2021 - abril de 2022 (8 meses)

## BYJU'S

Programming Instructor | JavaScript | HTML | CSS

junho de 2021 - outubro de 2021 (5 meses)

- Instructed programming classes for approximately 20 children and teenagers, tailoring lessons to meet individual needs, including students with autism and hyperactivity.
- Taught programming fundamentals and machine learning concepts using JavaScript and ECMAScript, guiding students through code analysis, debugging, and understanding errors and exceptions.
- Tutored students on creating responsive websites using HTML, CSS, JavaScript, and Bootstrap, emphasizing best practices in web development.

## eCGlobal Solutions

Front End Developer Intern | ReactJs | CSS

maio de 2021 - agosto de 2021 (4 meses)

Salvador, Bahia, Brasil

- Developed new features for the company's legacy social networking platform using React.js and Atomic Design principles, ensuring adherence to existing design patterns. This approach enhanced the user interface and contributed to a 5% increase in user engagement.
- Used a robust data fetching mechanism using GraphQL enhancing the application's performance by reducing loading times and delivering seamless user experiences in React applications.

---

## Formação acadêmica

IFBA - Instituto Federal da Bahia

Análise e desenvolvimento de sistemas, Tecnologia da

Informação · (2019 - 2025)
